

The Study of Global Capitalism: From Inter-national to Inter-temporal Comparison of Economic Institutions

Lecture by Andreas Nölke

Thursday, October 16, 2014
4 p.m., Room A 300

Invitation

The lecture develops a research programme for the historical comparison of different stages of capitalism. Starting from historically comparative theories of capitalism, Andreas Nölke will sketch a model that draws especially on Polanyi and theories of organized capitalism. He validates this model by discussing the current crisis of the liberal stage of financialization, as well as the contemporary economic model of state capitalism in large emerging economies as a potential model for a new stage of non-liberal capitalism.

Andreas Nölke is Professor for Political Science with focus on international relations and international political economy at Goethe University Frankfurt/Main.
